

At Hyundai Card, we believe in the power of design, music, and the arts to enrich everyone's lives, and we have been thrilled to partner with The Museum of Modern Art since 2006 to support their mission of sharing the very best of modern and contemporary art with the world.

During this transformative moment for the Museum, we are pleased to build upon this legacy of support through a renewed partnership and the launch of The Hyundai Card Performance Series. The Series will support the continuation and expansion of experimental media and performance-based programs in The Marie-Josée and Henry Kravis Studio, the galleries, and beyond. We are proud to sponsor a wide range of exciting and thought-provoking projects as part of the new MoMA, including the inaugural Kravis Studio installation David Tudor and Composers Inside Electronics Inc.: *Rainforest V (variation 1)*; an exploration of Pope.L's multidisciplinary career in the upcoming landmark retrospective *member: Pope.L, 1978–2001*; and the Museum's first major solo installation by a Korean artist, Haegue Yang's *Handles*.

Hyundai Card is a leading premium credit card company based in Seoul, Korea. We aim to provide customers with unparalleled access to premium products, and digital and cultural services. Through our commitment to media and live arts at MoMA, we aim to share all forms of visual expression with our cardholders and audiences around the globe.
